EDUCATION

BSCS • NOVEMBER 2022

Government College University
Lahore.

KEY SKILLS

- Web Development
- My SQL
- PostgreSQL
- MongoDB
- Node Js
- React Js
- React Native
- Nest Js
- Python (FastAPI)
- REST API
- Stripe
- Problem Solving
- Communication Skills
- GitHub
- Working With Teams
- Leadership

INTERESTS

- Programming & Technology
- Learning New Skills
- Gaming
- Traveling

PROFILE

Software Engineer with experience in full-stack web development and backend systems, specializing in NestJS, ReactJS, Python FastAPI and modern databases. Proven experience building scalable applications, statistical analysis systems, data-driven platforms.

Team-oriented engineer | Clean & performant code

EXPERIENCE

CODEBRICKS, JOHAR TOWN LAHORE — SOFTWARE ENGINEER • July 2025 – PRESENT

Worked on Python Fast API to develop a statistics-based application for data analysis. Implemented statistical algorithms including:

- ANOVA
- Principal Component Analysis (PCA)
- Tukey's HSD Test
- Designed and optimized APIs for statistical computation and reporting.
- Built and maintained full-stack features using Nest JS, ReactJS, and FastAPI.
- Collaborated on projects such as FlavorWiki and similar data-driven applications.
- Integrated backend services with frontend dashboards for real-time data visualization.
- Focused on clean architecture, reusable components, and performance optimization.

I2C —SOFTWARE ENGINEER • JANUARY 2024 – JUNE 2025

- Worked on multiple Struts-based enterprise applications.
- Developed responsive and user-friendly frontend components.
- Implemented new features using MySQL queries and backend APIs.
- Collaborated with cross-functional teams to deliver production-ready solutions.
- Contributed to API development and integration for enhanced system functionality.

GIGALABS, JOHAR TOWN LAHORE — JUNIOR SOFTWARE ENGINEER • NOVEMBER 2022 – JANUARY 2024

- Designed and developed a scalable inventory management system.
- Tech stack:
- NestJS (Backend)
- ReactJS (Frontend)
- PostgreSQL (Database)
- Built modular and maintainable backend architecture using dependency injection.
- Developed responsive UI components and managed state using Redux.
- Collaborated with teams to add new features and improve performance.
- Gained strong experience in full-stack development best practices.

PROJECTS HIGHLIGHTS:

Inventory Management System (Asset Management App)

- Built using **Nest JS, React JS, PostgreSQL**
- Implemented scalable backend architecture
- Developed responsive frontend with efficient state management
- Optimized database queries for fast data retrieval

Incubation Center — Social Media Application

- MERN Stack (MongoDB, Express, React, Node.js)
- Platform for entrepreneurs, mentors, and investors
- Implemented real-time data flow and scalable backend services
- Used Redux for centralized state management

Additional Projects & Integrations

- Stripe Connect & Express Dashboard integration
- CSV upload, parsing, comparison, and storage using APIs
- Twilio chat integration
- Location-based services using Navigator API and third-party APIs
- Version control and deployment using GitHub
